I am a Phoenix-based UX Designer with an interest in developing straightforward and intuitive experiences. I also enjoy front-end coding.

Skills

UX/UI Design

Visual Design

Wireframing

Project Management

User Research/Testing

Brand Strategy

Front-end Development

Japanese

Primary Tools

Figma

Usability Hub

GitHub

HTML, CSS, JavaScript

InVision Studio

Projects

simplifi
A UX design project for a theoretical budgeting app. Conducted research, built designs in Figma and tested with Maze, and iterated based on user responses and test results.

See it here

InStereo
A UX design project based around a potential music-based cloud storage app. Utilized Google questionnaires to conduct research, then built and iterated on design frameworks using Figma.
